item 10 b. (2) (b), 26 June 1963

1. USIB has directed CODIB to draft the portion of the response to reference a dealing with Objective 3, which reads:

"That research be intensified to determine the usefulness of data processing techniques, including mechanized title or summary sentence permutation, to facilitate review and assessment of the great volume of material that must be dealt with in the intelligence community."

2. On 10 July, your chairman and Mr. McCarn, DIA, met with the USIB Working Group to discuss the scope of CODIB's contribution. Inasmuch as the contributions are due to the Working Group on 5 August, it is essential that we get the ideas and facts from CODIB members in about one week, or by 18 July.

3. In preparing responses, the following questions should be answered to provide an approach to the query concerning Objective 3:

How are we assisting the intelligence analyst to effectively use the voluminous information which must be handled? (This includes efforts being made to make the problem more manageable by reducing the volume going to the analyst.)
